

# Foam Disc Pig

2" - 48"

## Options

- Sizes 2" to 48"
- Handling rope/cable
- Transmitter cavity
- Magnets
- Medium or heavy density foam

## Description

The Foam Disc Pig is a single piece construction of polyurethane foam with a durable polyurethane elastomer coating. The edges of the foam discs are left bare to provide a sealing surface, while the space between discs is coated to create durability and strength, while the space between discs is coated to create durability and strength. The Foam Disc can be used as a Bi-directional tool with its versatile design. Foam Disc pigs are a great option for batching, product removal, dewatering, hydrostatic testing and product recovery from process lines.
